

Charge air hose

Replaces

1809771 (1.11618)
2057832 (1.11619)

Suitable for

Scania P-/G-/R-/T-Series
Scania 4-Series
Scania Bus 4-/F-/K-/N-Series

Product details

Outer diameter: 107 mm
Inner diameter: 100 mm
Length: 180 mm
Material: MVQ/FMVQ (1.11618)
ECO/MVQ (1.11619)

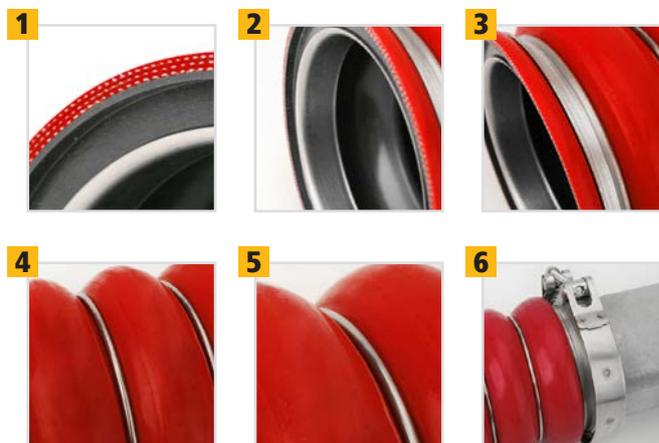

Product info:

The charge air hoses 1.11618 and 1.11619 are characterised by high-quality workmanship. The correct material composition is particularly important for the long service life of the charge air hoses.

At the same time, the products remain elastic due to defined folds and multi-layered textile inserts. The required stability of the charge air hoses is provided by stainless steel support rings and reinforcement rings at the ends of the hoses, which ensure perfect installation and a firm fit of the charge air hoses.

Structure of the charge air hoses

- 1 Textile insert
- 2 Reinforcement rings inside
- 3 Reinforcement rings outside
- 4 Defined folds
- 5 High-quality support rings made of stainless steel
- 6 Precisely fitting clamps

Charge air hose

Tips & tricks

The charge air hoses must not be interchanged due to different material compositions in order to avoid premature failure. If there is excessive oil or foreign matter such as metal chips in the charge air hoses, it must be checked whether there is a defect in the turbocharger and whether the charge air cooler must also be replaced.

When installing the charge air hoses, care must be taken to ensure that the charge air hoses and the clamp are installed in a perfect, tension-free position, as otherwise the air compressed by the turbocharger can escape. This can lead to power losses or even to turbocharger engine damage. If there is a leak, the engine indicator lamp may light up and the engine power may be reduced.

DT Spare Parts

The complete range of the brand DT Spare Parts offers all the spare parts required for the repair and maintenance of commercial vehicles. The constant high quality level is achieved by uncompromising quality assurance and the continuous product optimization within the framework of the Diesel Technic Quality System (DTQS).
