

## Bleeder valve

### Replaces

1515098

### Suitable for

Scania P-/G-/R-/T-Series  
Scania Bus 4-/F-/K-/N-Series  
Scania 4-Series  
Scania L-/P-/G-/R-/S-Series

### Product details

Height:	max. 53,5 mm
Width:	max. 15 mm
Weight:	0,06 kg
Thread:	M10 x 1.0 6H
Width across flats:	SW 17

### Product info:

This bleeder valve, which is attached directly to the common rail, can be used to vent it after installing a new fuel filter unit. The opening is protected from dust and dirt using the end protection cap attached to the valve.

Based on the 9-point testing plan used for this product, the valve is evaluated for flawless function, correct dimensions and further optical characteristics to ensure trouble-free operation.

### Bleeder valve structure

- 1** M10 x 1.0 thread
- 2** Safety pin
- 3** Bleed screw
- 4** Air vent with connectivity

## Bleeder valve

### Tips & tricks

To prevent faults and leaks of the valve, the correct seal must be used during assembly. It must be tightened to the torque specified by the manufacturer.

To bleed the article, the appropriate adapter must be pushed onto the bleeder valve and the fluid collected in a catchment tank via an approved hose, at best transparent. This prevents the fuel getting into neighbouring components and the environment. The hose also allows air particles in the system to be detected. It must also be ensured that the air was fully pumped out of the system to ensure flawless function. Rinsing based on the manufacturer's requirements is required if there are contaminants in the fuel system.

### DT Spare Parts

The complete range of the brand DT Spare Parts offers all the spare parts required for the repair and maintenance of commercial vehicles. The constant high quality level is achieved by uncompromising quality assurance and the continuous product optimization within the framework of the Diesel Technic Quality System (DTQS).
